## **EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**

### ***Allowable Subject Matter***

1. Claims 1-51 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the primary reason for allowance is that the prior art fails to teach or reasonably suggest that the camera unit comprises a housing to receive the camera sections to be oppositely directed on a same line.

As for claim 5, the primary reason for allowance is that the prior art fails to teach or reasonably suggest a first camera section used a digital still camera and a second camera section used as a digital video camera, wherein the first and second camera sections are located so that photographing directions thereof are opposite to each other.

With regard to claim 9, the primary reason for allowance is that the prior art fails to teach or reasonably suggest that the hinge section comprises a first hollow shaft member rotatably installed in a bore provided in the housing, and a second hollow shaft member assembled to be rotatable in relation to the first shaft member and secured to the bore.

Regarding claim 32, the primary reason for allowance is that the prior art fails to teach or reasonably suggest that the camera unit comprises a housing to receive the camera sections to be oppositely directed on a same line, wherein the first camera section is used a digital still camera and the second camera section is used to photograph moving images.

As for claim 39, the primary reason for allowance is that the prior art fails to teach or reasonably suggest that the bottom of the battery section is provided with a pair of power

Art Unit: 2622

terminals electrically connected to the battery, the locking release section and the power terminals are spaced from each other in opposite directions in the battery mount section, the detaching unit is provided on the bottom of the battery mount section and positioned more adjacent to the locking release unit than to the power terminals

With regard to claim 40, the primary reason for allowance is that the prior art fails to teach or reasonably suggest that the battery mount section is concavely formed on an outside of the housing to be offset about a rotational center of the housing.

Regarding claim 42, the primary reason for allowance is that the prior art fails to teach or reasonably suggest that the housing has a curved surface in at least one end thereof formed to have a center of curvature identical to a center of curvature identical to the concavely curved surface of the battery mount section.

As for claim 44, the primary reason for allowance is that the prior art fails to teach or reasonably suggest that the camera unit comprises a housing to receive the first and second camera sections to be oppositely oriented with reference to the rotational axis.

With regard to claim 51, the primary reason for allowance is that the prior art fails to teach or reasonably suggest a camera unit installed in the body with a plurality of camera sections having pixel numbers and independently driven, a mode sensing unit to sense a photographic mode from among a plurality of different photographic modes, a control unit to select the photographic mode and to drive the camera unit corresponding to the photographic mode, wherein the photographic mode sensed by the mode sensing unit is determined from among the different photographic modes according to the rotated angle of the camera unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
